BATHROOM ACCESSORIES

that

express in themselves the trend of the present era are presented in the "Era-Craft" Hexagon Design illustrated herein. They are of the highest quality cast bronze, heavily chromium plated and fitted with concealed fastenings. The product of experienced craftsmen. Essential units to the modern luxurious bathroom. We present also our regular line, worthy of like merit, to those who prefer the round flange design.

REG. TRADE MARK

J

Mirrors and Cabinets in conservative and modernistic designs with stainless steel, brass, chromium plated or nickel silver frames. Inquiries are invited.

Accessories in strict accordance with the Federal Government and Navy Department specifications, of brass, nickel or chromium plated finish—also nickel silver.

JENKINS' CONCEALED FASTENING

THE Jenkins' Concealed Screw Device used in installation of our Bathroom Accessories is so designed as to secure a positive and rigid anchorage to the wall, eliminating any unsightly screw heads which frequently spoil the appearance of otherwise beautiful fixtures.

Besides combining all the merits of other devices of this character, the Jenkins' is outstanding with additional merits distinctively its own.

The separate wall plate is first fastened to the wall with ordinary flat head screws, toggle bolts, expansion bolts or any other suitable anchorage. The edge of this wall plate is beveled to engage with an under-cut bevel on the fixture itself. The post on the wall plate is flat on the underside and the set screw inserted in the fixture tightens against this flat surface drawing the fixture down so that the beveled under-cut of the fixture binds by engaging with the bevel of the wall plate thus drawing the fixture securely against the wall.

This provides a two-point contact and by binding at the bevel a strain is placed upon the set screw which precludes any possibility of its loosening. Jenkins' fixtures once installed will never loosen. This cannot be true of any fixtures held with a one-point set screw contact.

Facility in installation and a decided saving of installation expense is accomplished through the free interchangeability of all fixtures. The contractor can install all wall plates on any job in advance of the fixtures with an assurance that after the building is completely decorated the fixtures can be attached to the wall plate and that he will encounter no difficulties in finding that they are not readily applied or interchangeable in every respect and there will be no marring of wall finish or injury to the finish of the fixtures while final decorating is being done.

In public buildings where possibility of theft is encountered, set screws with a special slot requiring a key for tightening, rather than a screw driver, can be furnished.

The shelf bracket as illustrated is designed for holding the glass shelf firmly and securely. It leaves the top of the shelf free from all obstruction. The back edge of the shelf is pressed against the bullet-type catch and the front edge lowered into place; the finger of the bracket firmly gripping the bevel edge of the glass shelf.

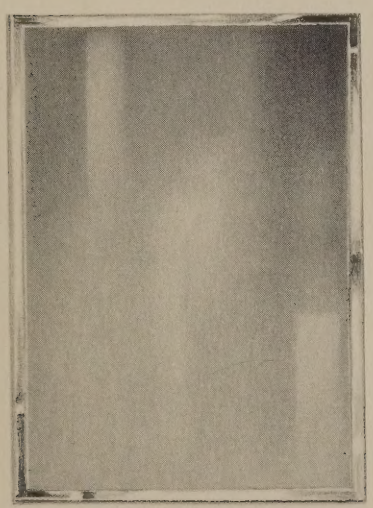
J-900

The mirror illustrated above is designed to harmonize with our hexagon pattern bathroom accessories. The frame is constructed of channel shaped brass, half inch wide on the face.



J-902

Constructed of channel shaped brass with half inch wide face.

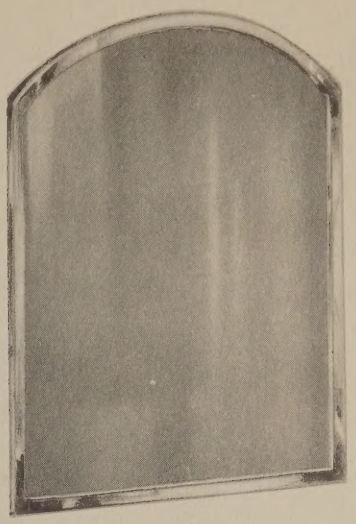
Mirror frames may also be obtained of stainless steel, solid nickel silver polished or chromium plated or brass nickel plated.

MIRRORS

All mirror plates are furnished with copper backing, a positive and lasting protection against moisture. They are carefully assembled to the frames and may be obtained with bevel if desired. The frames are of brass, heavily chromium plated, fitted with sheet metal back and with concealed fastenings. They may be obtained in the following sizes:

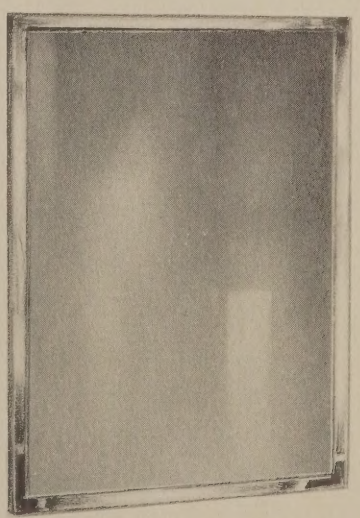
Size No. 1 — 12" x 18"
Size No. 2 — 16" x 20"
Size No. 3 — 18" x 24"
Size No. 4 — 18" x 30"
Size No. 5 — 18" x 36"
Size No. 6 — 18" x 48"

Other sizes to order.



J-901

The mirror illustrated above is well suited for use in staterooms and bathrooms of the modern steamship where the cambre of the overhead deck is such that a rectangular shaped mirror does not apear well. Constructed of channel shaped brass with half inch wide face.

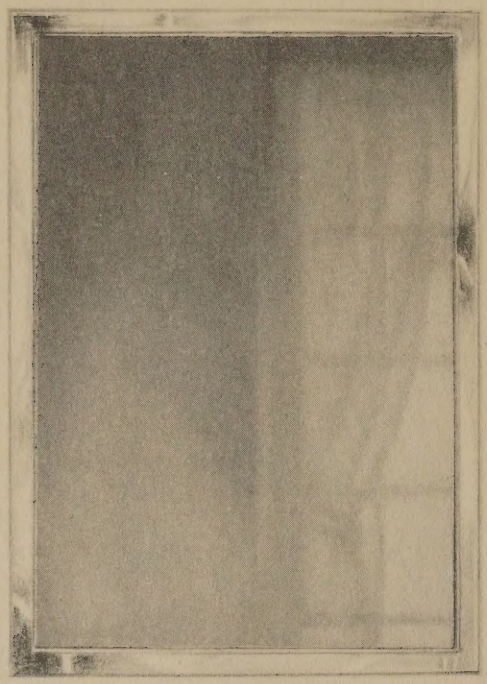


J-903

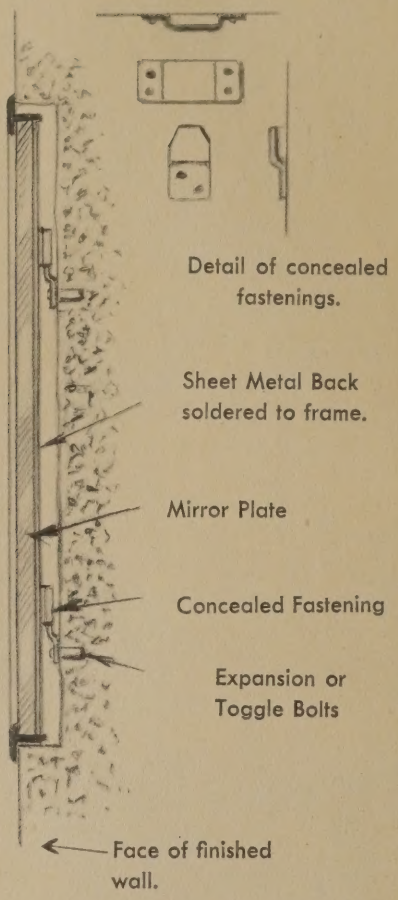
Constructed of angle shaped brass with ½" wide face.

J-904

Constructed of angle brass with 1" wide face.



J-905



Government Recess Type Mirror

The mirror illustrated above is known as the recessed type with the mirror frame set flush on the finished surface of the wall. There are no exposed screws as it is supported in the recess by means of concealed fastenings as shown in the detailed sketch. The 1" wide frame is constructed of extruded metal and may be furnished in brass with nickel plated or chromium plated finish, solid nickel silver polished or chromium plated. The mirror plate is copper backed and is held in position by means of a sheet metal back soldered to the frame, and with the necessary protection between mirror and back. The concealed fastenings are securely riveted to the back. Means are also provided, but only when so specified, to insure against theft—Mirrors are furnished to size and order only. — Prices upon application.
